

# 2017-2018 Master's Toolbox Project: Royal Rangers International

## AFRICA

Royal Rangers and BGMC are partnering through Master's Toolbox to make a major impact in Africa over the next two years by implementing these three objectives:

### 1 Provide Royal Rangers training and resources in Swahili

Swahili is considered by Africans in that region as "the language of our grandfathers." Royal Rangers resources offered in Swahili bring about a higher level of comprehension and application while also adding to the perceived integrity of the resources and ministry.

### 2 Equip and build new structures at the national Rangers training center in Kenya

A tradition of African families is to take 13-year-old boys through a right-of-passage ceremony conducted by witch doctors. This is so steeped in the tradition of Africans that even Christian boys participate. Thus the Kenya Assemblies of God created the Royal Bridging Centre as an alternative rite of passage, to be held in the new Royal Rangers Training Center.

*New Royal Rangers Training Center in Kenya*

### 3 Establish the Royal Rangers ministry in seven new nations in Africa.

Our challenge for Africa is to plant 700 or more African outposts throughout the continent.

*Let us challenge our Rangers leaders and boys as never before to make an eternal impact in the lives of boys in Kenya and throughout Africa!*
